Just show me the data, baby!!!
R
I only used 467 packages for the loging page!!!
JavaScript
Let's make a kernel module to receive low-level signals from Arduino motes!
C
((((I think (I miss (I, parentheses)))))
Lisp
Make sure of the 4-space indentation and snake_case notation (HAHAHA! Python = snake_case!!!)
Python
Every animal will be a thread, so we can handle 3 billion animals in 0.5 seconds
Go

Social Classes in OpenSource

Ralph Goers

rgoers

I am a Member of the Apache Software Foundation and am a PMC member of Apache Commons, Apache Flume, Apache Logging Services, and Apache Maven. I created the initial versions of Apache Log4j 2 and continue to focus most of my efforts there providing support and enhancements to try to make Apache Log4j 2 the best logging framework for Java developers.

I currently have a full time job as a Software Architect. I work on Log4j and other open source projects in my spare time and so I typically work on those issues that are of most interest to me. I have always dreamed of working on open source full time and would love your support to enable that to happen.

3 sponsors are funding rgoers's work.

Volkan Yazıcı

@yazicivo

Log4j maintainers have been working sleeplessly on mitigation measures; fixes, docs, CVE, replies to inquiries, etc. Yet nothing is stopping people to bash us, for work we aren't paid for, for a feature we all dislike yet needed to keep due to backward compatibility concerns.

Aleksey Shipilëv @shipilev · 12月10日

Sending hugs to Log4J people. This must be an extraordinarily shitty Friday for them. twitter.com/brunoborges/st...
